

inner Reach[®] Corporation

a Health Psychology Preventive Care Technology Company

WHO WE ARE

Inner Reach Corporation is a Health Psychology Preventive Care Technology company that provides online tools for consumer self-testing to build Health Biography and for personal health education.

Our tools are for preventive self-care and for healthcare to facilitate delivery of the right self-care and healthcare at the right time in the right place.

Inner Reach is dedicated to technology systems that simplify the consumer healthcare and self-care experience to improve care quality and to reduce cost.

INTERACTIVE HEALTHCARE CONSUMER INVOLVEMENT IN PREVENTIVE CARE.

Inner Reach is a Stewardship for Humanity[®] carefully collecting and managing Humanity's Histories and Health Biographies. Inner Reach gathers real-time data online directly from the consumer/patient. Our platform is a "Consumer Health Management System" for "Interactive Healthcare Consumer Involvement in Preventive Care".

Our products also act as a Health Status Legacy for family. We provide technology solutions for the healthcare consumer while also aiding insurers, medical providers, companies, and government agencies.

Copyright Inner Reach Corporation ©1998-2014 All rights reserved.

HiGS is a Health Biography Manager. We wrap together health psychology, software technology and internet communication.

Health psychology is based on health preservation, disease prevention, and delay of disease and its progression. We primarily address prevention and wellness to reduce the need for care. The healthcare community primarily addresses sickness care. HiGS effectively facilitates wellness and disease management.

HiGS is a Consumer-Authenticated Information System (CAIS)[™]
for Health Biography.

Inner Reach has developed a complete suite of Internet-based real-time protocols, questionnaires, and educational materials as well as an Electronic Health Record (EHR) that we call 'Health Biography' for consumers.

The HiGS product suite is the first and the only Consumer-Authenticated Information System (CAIS) for Health Biography. This fact authentication is a security measure to insure care continuity and to reduce the likelihood of duplicated effort, cost, and mistakes.

OUR COMPETENCES INCLUDE:

- **Health Psychology:** is a biological, psychological, sociological, medical model with nutritional, environmental, and occupational components – a total person approach to health and wellness.
- **HiGS** is the Inner Reach core product, our Health Information Gathering System. HiGS has evolved since 1993 to be a Preventive Care Technology with relevant health education to preserve health and prevent and delay disease through collecting broad and deep self-knowledge and to effect change.
- **Health Risk Assessments (HRAs)** – facilitate: risk identification; lots of data.
- **Health Biography:** is as comprehensive as the consumer wants and needs it to be. Results are gathered from HiGS Histories, HRAs, the Signs & Symptoms Tracker and the Fitness Tracker. (The user decides what goes into it, who sees it and what parts are shared.)

WHO CAN BENEFIT FROM USING THE COST SAVINGS HIGS?

- Companies, Insurers, and Governments
- For their Employees/Insured/Consumers... the End Users of HiGS
