

WE OFFER HEALTH BIOGRAPHY FOR CONCIERGE MEDICINE

HEALTHCARE IN AMERICA IS IN A STATE OF FLUX. HiGS TECHNOLOGY HAS SOLUTIONS THAT WORK

Consumers are discovering the Patient Protection and Affordable Health Care Act (PPACA) known as “ObamaCare”, espoused to reduce national health expenditure, is making healthcare and its insurance unaffordable for many citizens. Many consumers who liked their policies and doctors and wanted to keep their policies and doctors...now, or in the near future, cannot keep their policies and doctors. Cost will rise. Healthcare access problems will flourish. This instability in healthcare delivery will drive the direction of the doctor-patient relationship in the near and distant future.

Consumers want immediate access to a physician when they are sick. They want doctors who know them well and therefore can treat them with care and diligence. Waiting for healthcare can cause big trouble and lost lives. Concierge Medicine helps to meet this access need. The research informs that currently more affluent people can afford the Concierge Medical model but overall demand for this model is growing.

Daniel Carlin, MD, CEO of WorldClinic said in an interview, “In the short term, I think there will be a continued degradation of basic primary care and a worsening of the quality of medical care available to most people. This represents a significant opportunity for the field of concierge medicine, which will no doubt thrive as a result.”^[1] Concierge Medicine enables fast access to doctors. HiGS will be a key tool for the emerging Concierge Practice. With HiGS, Concierge Doctors and their teams can swiftly monitor their patients’ stories to improve outcomes while cost lessens.

HiGS[®] Personalized Health Data

- Give your patients something extra—a perk
- Add data outcome sales to your income
- Make your patients feel special; offer HiGS
- Monitor your patients’ Health Biography as needed, including Signs & Symptoms
- HiGS facilitates preventive care and self-care

The U.S. population will be required to take greater responsibility for their own care and to stay healthier. “ObamaCare” may lead to a shortage of doctors and a long wait to get access to doctors and care. Consequently, Concierge Medical Practices will be an essential healthcare delivery necessity for many Americans.

By providing this easy to use HiGS Health Biography to your patients you can know more about them. They can know you know what they want you to know. This aids trust and compliance. The use of HiGS by your patients allows you to monitor what is going on with your patients. HiGS data enable effective and speedy communication of your patients’ health stories to facilitate boutique personalized care and sound preventive measures. Concierge Medicine benefits from the extra personalized care that HiGS usage brings.
